

PROLONG ENGINEERING

Providing World-class Flooring &
Coating Solutions

Affordable Cost

Short Time Delivery

Customer Support

ABOUT US

Prolong Engineering are dedicated to manufacturing quality products that help our customers improve their work environments.

We have a wide range of products that can suit your needs and budget. Our team is available to answer any questions you may have about our products or services.

Our team is committed to excellence in all that we do. We work hard to exceed customer expectations with each project that we undertake.

We provide a complete range of services including design, installation, and financing options for your project, as well as warranty services for all our products.

PROLONG ENGINEERING

OUR PRODUCTS :

DIY- Acrylic Floor Paints :

Painting your floor is not exactly the same as painting walls and other surfaces. Since it has high traffic and more chances of damage, the key thing to look out for is a formulation for superior durability.

There are two types of floor paint ? latex acrylic paint for concrete and pre-mixed one-part epoxy floor paints. Of the two, professionals go with the one-part epoxy paint. Epoxy resin mixed in with the acrylic latex creates a finish that bonds with concrete better, and provides strong resistance to mold and mildew, chemicals, and chipping.

ANTICORROSION

Anti Corrosion Epoxy Paint :

These coatings used in marine weather or near high moisture area. These are mainly used to prevent the corrosion of metal and avoid the loss of the metal due to corrosion. The metal gets oxidized and loses its strength and property of supporting structure.

This can be prevented with the help of suitable product. The product should be chosen after considering the main causes of the corrosion. If the corrosion is due to any other reason than moisture, then the chemical resistant coating should be used.

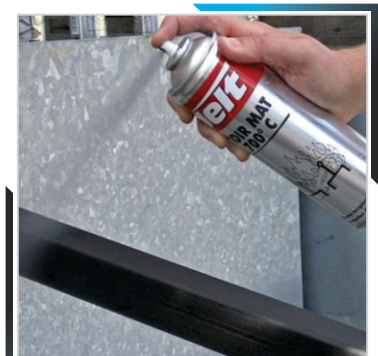

Anti Corrosive Epoxy Primer :

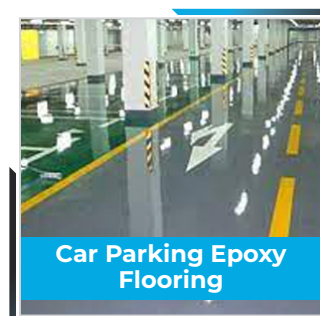

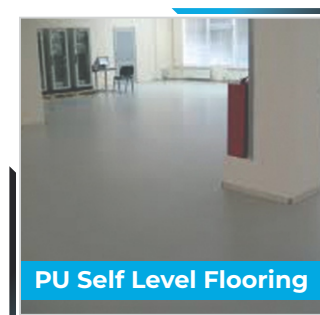

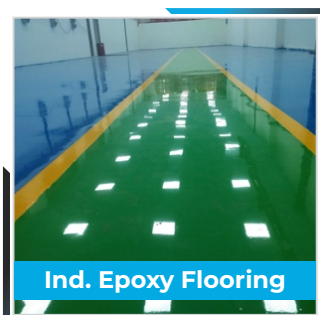

Epoxy primer is a 2K anti-corrosive VOC compliant primer with excellent salt spray resistance for application to most substrates. Suitable as a primer or as a primer filler for industrial refinish applications, the primer also provides excellent anti-rust protection.

Anti Corrosive Epoxy Primer Uses :

- Easy to apply.
- Excellent anti-corrosion resistance.
- Good sanding.
- Excellent topcoat gloss holdout.
